Reasons for Allowance

1. The following is a statement of reasons for the indication of allowable subject matter:
2. United States Patent No. 5,460,566 to Joe O. Trahan (Trahan) fails to teach each and every limitation of the instant invention. Specifically, Trahan fails to teach attaching the eccentric weights to the motor, and attaching the motor to the exterior wall of the container which is disclosed as an essential element of claimed invention, as described in claim 1.
3. Further, while Trahan and the prior art of record, when taken together appears to teach each and every element of the invention, the references, and the prior art of record, apparently fail to provide the requisite motivation for making the instantly claimed combination. For the foregoing reasons, and others, claims 1, 3-7, renumbered as 1-6, are believed to recite patentable subject matter.
